

## Preface

The first question raised by a book titled *Alternatives Beyond Psychiatry* is this: Why do we need alternatives? What is wrong with the “care” that mainstream psychiatry provides? While there are many answers to that question, first and foremost we can look at one startling statistic, and that is the rise in the number of people disabled by “mental illness” over the past 50 years.

The modern drug-based paradigm of psychiatric care dates back to 1954, when chlorpromazine was introduced as the first antipsychotic medication. This, or so psychiatry would like us to believe, kicked off a great leap forward in society’s care of the “mentally ill.” Psychiatric researchers are said to have made great strides in understanding the biological causes of mental disorders and that has led to the development of ever better drugs for treating them. Yet, here is what all this “progress” has wrought: in the United States, the rate of the “disabled mentally ill” has increased nearly six-fold in the past 50 years, from 3.38 people per 1,000 population in 1955 to 19.69 people per 1,000 population in 2003. Since the introduction of Prozac<sup>1</sup> in 1987—this was the first of the second-generation psychiatric drugs said to be so better than the first—the number of so-called disabled mentally ill in the United States has been increasing at the rate of 150,000 people per year, or 410 people newly disabled by “mental illness” every day.

Other countries that have adopted a drug-based paradigm of care, such as the U.K. and Australia, have also reported a great surge in the number of people disabled by mental disorders in the past 50 years. This interesting fact leads to only one conclusion: mainstream psychiatry’s paradigm of care has failed. It has not proven to be an approach that helps people struggling with mental distress of some kind—depression, anxiety, mania, psychosis, etc.—

1 Antidepressant, active ingredient fluoxetine, marketed also as Auscap, Deprax, Eufor, Flexetor, Fluohexal, Fluox, Fluoxebell, Fluoxetine, FXT, Lovan, Movox, Oxactin, Plinzene, Psyquial, Sarafem, Veritina, Zactin, etc.; component of Cymbyax

recover and get on with their lives. Instead, it has proven to be an approach that increases the likelihood that such people will become chronically ill.

We desperately need to think of alternatives to that failed paradigm of care. That is a big challenge, and yet the contributions in this timely and much needed book all ultimately point to a common starting point: if we want to help those struggling with their minds, we can start by thinking of them—as the Quakers did when they rebelled against mainstream psychiatry in the late 1700s and early 1800s—as “brethren.” Not as people with “broken brains,” but simply as people who are suffering. From that conception, a whole world of “care” follows. What does everyone need to stay well? Shelter, food, friendship, and something meaningful to do with his or her time. Any society that provides such care and support, along with a message of hope—that people can recover from whatever mental distress they may be suffering—makes a good start at providing an effective alternative to psychiatry.

There are chapters in this book that tell of such programs. There are proven alternatives to psychiatry, programs that have a track record of helping people get better. And there are reports of ways of coping with madness on an individual level. This book hopefully will encourage many, many other such efforts to take root and flourish.

## Contents

Preface . . . . .	11
<i>Robert Whitaker</i>	
Note about Liability . . . . .	13
Introduction . . . . .	15

### Why Psychiatry Hurts More Than It Helps

Introduction . . . . .	17
Seventy Years of Coercion in Psychiatric Institutions, Experienced and Witnessed . . . . .	19
<i>Dorothea S. Buck-Zerchin</i>	
The Illusion of Mental Illness . . . . .	29
<i>Kate Millett</i>	
Antipsychiatric Work by Relatives: Unrestrained Anger and Commitment to Alternatives . . . . .	38
<i>Uta Wehde</i>	

### Actual Alternatives

Introduction . . . . .	41
A. Individual Strategies with and without Professional Support	
What Helps Me if I Go Mad? With Contributions by Ludger Bruckmann, Chris Hansen, Andy Smith, Sarah Carr, Alfred Hausotter, Merinda Epstein, Harold A. Maio, Agnes Beier, Peter Lehmann, Zoran Solomun, Ursula Zingler, David Webb, Tina Coldham and Constance Dollwet . . . . .	44
<i>Peter Lehmann</i>	

How We Discovered the Soteria Principle . . . . .	75
<i>Regina Bellion</i>	
Depression and the Use of Natural Healing Methods . . . . .	83
<i>Bhargavi Davar</i>	
Running from the Crisis . . . . .	90
<i>Ulrich Bartmann</i>	
Advance Directives: A Step towards Self-help . . . . .	97
<i>Miriam Krücke</i>	
<b>B. Organized Self-help</b>	
Survival, the Art of Living and Knowledge to Pass on: Recovery, Empowerment and Experiential Expertise of Persons with Severe Mental Health Problems . . . . .	105
<i>Wilma Boevink</i>	
Reclaiming Mad Experience: Establishing Unusual Belief Groups and Evolving Minds Public Meetings . . . . .	117
<i>Rufus May</i>	
The Voices Accompany My Life . . . . .	128
<i>Hannelore Klafki</i>	
INTERVOICE: Accepting and Making Sense of Hearing Voices . . . . .	131
<i>Marius Romme and Sandra Escher</i>	
The Icarus Project: Dangerous Gifts, Iridescent Visions and Mad Community . . . . .	137
<i>Maryse Mitchell-Brody</i>	
<b>C. Models of Professional Support</b>	
Soteria: An Alternative Mental Health Reform Movement . . . . .	146
<i>Volkmar Aderhold, Peter Stastny and Peter Lehmann</i>	
Hotel Magnus Stenbock: A User-controlled House in Helsingborg, Sweden . . . . .	161
<i>Maths Jespersen</i>	

The Windhorse Project . . . . .	168
<i>Michael Herrick, Anne Marie DiGiacomo and Scott Welsch</i>	
The Crisis Hostel: Findings from a Consumer/Survivor-defined Alternative to Psychiatric Hospitalization . . . . .	179
<i>Jeanne Dumont and Kristine Jones</i>	
Finding Common Strength Together: The Berlin Runaway House . . .	188
<i>Petra Hartmann and Stefan Bräunling</i>	
Second Opinion Society: Without Psychiatry in the Yukon . . . . .	199
<i>Gisela Sartori</i>	
Trauma-informed Peer Run Crisis Alternatives . . . . .	210
<i>Shery Mead</i>	
A Sicilian Way to Antipsychiatry: La Cura . . . . .	217
<i>Giuseppe Bucalo</i>	
Open Dialogues . . . . .	223
<i>Jaakko Seikkula and Birgitta Alakare</i>	
Psychotherapy Instead of Psychiatry? A No-brainer . . . . .	240
<i>Theodor Itten</i>	
<b>General and Specific Beneficiaries of Alternative Approaches</b>	
Introduction . . . . .	253
Families: A Help or Hindrance in Recovery? . . . . .	254
<i>Karyn Baker</i>	
Choice and Diversity: Developing Real Alternatives for People from Non-Western (and Western) Cultures . . . . .	260
<i>Philip Thomas and Salma Yasmeeen</i>	
Troubled Children and Teens: Commonsense Solutions without Psychiatric Drugs or Manipulations . . . . .	271
<i>Bruce E. Levine</i>	

When a Slice of Sausage Turns into a Lens-cleaning Cloth: To Respect and Support People with Dementia . . . . .	281
<i>Erich Schützendorf</i>	
The Shame of “Not Being a Man”: Experiences of Gay, Straight and Bisexual Men . . . . .	288
<i>Guy Holmes and Geoff Hardy</i>	

## Realizing Alternatives and Humane Treatment

Introduction . . . . .	297
Personal Ombudsman in Skåne: A User-controlled Service with Personal Agents . . . . .	299
<i>Maths Jespersen</i>	
PSYCHEX: A Swiss Experiment . . . . .	304
<i>Peter Rippmann</i>	
Money, Rights and Alternatives: Enforcing Legal Rights as a Mechanism for Creating Non-medical Model Alternatives . . . . .	308
<i>James B. Gottstein</i>	
Upholding Psychiatric Advance Directives: “The Rights of a Flea” . . .	317
<i>Laura Ziegler</i>	
MindFreedom International: Activism for Human Rights as the Basis for a Nonviolent Revolution in the Mental Health System . . . .	328
<i>David W. Oaks</i>	
MindFreedom Ghana: Fighting for Basic Human Conditions of Psychiatric Patients . . . . .	336
<i>Dan Taylor</i>	
User-led Research to Develop an Evidence Base for Alternative Approaches . . . . .	342
<i>Jan Wallcraft</i>	
Preparing People for User Involvement Work in Health and Social Care . . . . .	351
<i>Andrew Hughes</i>	

INTAR: The International Network Toward Alternatives and Recovery . . . . .	359
<i>Laurie Ahern, Peter Stastny and Chris Stevenson</i>	
Self-help, Difference in Opinion and User Control in the Age of the Internet . . . . .	366
<i>Peter Lehmann and Maths Jespersen</i>	
<b>Why We Need Alternatives to Psychiatry</b>	
Introduction . . . . .	381
Psychiatry: Its Diagnostic Methods, Its Therapies, Its Power . . . . .	382
<i>Marc Rufer</i>	
Beyond Models, Beyond Paradigms: The Radical Interpretation of Recovery . . . . .	400
<i>Pat Bracken</i>	
Reforms or Alternatives? A Better Psychiatry or Better Alternatives? . . . . .	402
<i>Peter Lehmann and Peter Stastny</i>	
<b>Appendix</b>	
Index . . . . .	413
